

Rob Mixon

FULL STACK DEVELOPER

Highly adaptable Software Engineer proficient in full stack web development. Passionate about the study of CS and how code and computers work. Looking for a place to grow with other leaders and goal-oriented professionals.

Projects

Decisive Friend JavaScript | React | Google API

Front End | Capstone Project | August 2020

Never fight about where you want to go again. Indecisiveness affects us all. Decisive Friend fixes that. This application decides for you on a place to eat to what coffee shop you want to study at. Never have that awkward back and forth again.

- Single page CRUD web app written in React.js/JS/CSS/HTML
- Makes calls to the Google Places API to give you a randomized place based off of your filtered search criteria
- Allows you to save your favorite places, make comments to your saved list, and filtered based off of type of place

github.com/RobMixon/decisive-friend-app

MyNutshell JavaScript | React | CSS

Front End | Group Project | August 2020

A social platform application that allows the user to interact with other users and communicate through posting public chats/messages, events, and articles as well as viewing their own reminder tasks list. My personal contributions include:

- Full CRUD functionality of the login, registration, home page, navigation and partner coding the articles portion achieved through utilizing extensive JavaScript with modular code using functional components and React Hooks
- Utilized specific relationships with JSON server to create fetch calls to retrieve proper information
